

Sain Engineering Associates, Inc. Awarded GSA CPES BPA Designation

Sain Engineering Associates, Inc. (SEA) was recently selected as one of the GSA CPES BPA (Comprehensive Professional Energy Services, Blanket Purchase Agreement) contractors. SEA is one of only 18 firms with a five-year open-ended contract to pursue stimulus-related energy projects with an estimated value of about \$500 million per year. With this designation, SEA will be given the opportunity to compete for individual task orders only available to 18 firms. There were in excess of 53 firms initially included on the GSA facilities/energy schedule. SEA's BPA contract is applicable to **all** SINs (special item numbers corresponding to various services such as REM services, metering, energy auditing, LEED, commissioning, etc.) and allows SEA to work in **all** GSA regions!

The following is a link to the GSA website that gives GSA's description of the BPA:
